

Target Market Determination

For MyLife MyPension Pre-Retirement Pension provided by Togethr Trustees Pty Ltd (ABN 64 006 964 049, ASFL 246383)

1. About this document

When to use this target market determination

This target market determination (TMD) seeks to provide existing and potential members, distributors and staff with an understanding of the class of members for which this product has been designed, having regard to the objectives, financial situation and needs of the target market.

This document is not to be treated as a full summary of the product's risks and features and is not intended to provide financial advice. Members must refer to the *Product Disclosure Statement* (PDS) and any supplementary documents when making a decision about this product.

Product Disclosure Statement to which this target market determination applies

This TMD applies to the MyLife MyPension Pre-Retirement Pension referred to in the following disclosure document:

- MyLife MyPension Pre-Retirement Pension *Product Disclosure Statement* 1 June 2022

Date from which this target market determination is effective

- 1 June 2022

2. Class of members that fall within this target market

The information below summarises the overall class of members that fall within the target market for MyLife MyPension Pre-Retirement Pension, based on the product's key attributes and the objectives, financial situation and needs that it has been designed to meet. MyLife MyPension Pre-Retirement Pension is for members over preservation age and under age 65, at any level of wealth. Members will have an objective of drawing an income from their superannuation savings through a compliant retirement income vehicle.

Product description and key attributes

The MyLife MyPension Pre-Retirement Pension provides members with a regular, flexible income stream, while ensuring compliance with transition to retirement regulations, including entry eligibility criteria and minimum and maximum draw down restrictions.

From 1 June 2022, the following changes to investment options apply:

The Property, Balanced Plus and FlexiTerm Deposit options are closed and will no longer accept applications, contributions, switches or transfers in. The RetirePlus and RetireStable options will only be available to Pension members. The RetirePlus and RetireStable options will not be available to Pre-Retirement members. For more information, please refer to mylifemypension.com.au/ioc. A new PDS will be issued 1 July 2022 to remove and clarify the availability of options (as applicable).

Investments

- Members can choose from 9 managed choice and 5 build your own investment options to tailor their investments according to their financial goals and risk tolerance.
- They can also switch their investment options at any time.

Payments

- Members can draw down a regular income at intervals suited to their needs.
- They can also choose between a nominated amount or set it to the minimum or maximum permitted amount.

Beneficiaries

- Members can make a binding or non-binding beneficiary nomination to advise how their account should be treated should they die.
- They can also make a reversionary beneficiary nomination.

Fees

- Members are charged an estimated investment fee between 0.05% to 1.05% per annum, depending on the investment option(s) they are invested in, to cover the trustee's costs of managing the investments.
- Members are charged administration fees of \$1.95 per week plus 0.20% per annum on a member's account balance (up to a maximum \$2,500 per annum).
- To cover the costs of external investment managers and services, members incur an estimated indirect cost ratio between 0% to 0.33% per annum, depending on the investment option(s) they are invested in, which reduces the value of their assets.
- In the event of a family law split, there will be a fee of \$75 split equally between the member and non-member spouse, to cover the trustee and administrator's cost of implementing the required changes.

Profit to members

- MyLife MyPension is a division of Equip, a profit-to-member industry superannuation fund.

Objectives, financial situation, and needs

The table below sets out the class of members that each investment option within MyLife MyPension Pre-Retirement Pension has been designed for. MyLife MyPension Pre-Retirement Pension's range of investment options allows members to choose investments suited to their financial goals and tolerance to risk.

| | | | |
|------------------------|---|---------------------|---|
| Growth Plus | <ul style="list-style-type: none"> • This option is designed for members who are prepared to accept an aggressive asset allocation which has the potential of providing higher returns, but also increases the risk of a negative return. • Members will be seeking a net return of at least 4.25% p.a. above inflation (measured by CPI) over rolling 10-year periods to achieve their investment objective. • The minimum suggested time frame to invest in this product is 10 years. • The risk level of this option is high, with a likelihood of negative returns occurring 5.3 years in a 20-year period. | Balanced | <ul style="list-style-type: none"> • This option is designed for members who want a balance between risk and return. • Members will be seeking a net return of at least 2.5% p.a. above inflation (measured by CPI) over rolling 7-year periods to achieve their investment objective. • The minimum suggested time frame to invest in this product is 7 years. • The risk level of this option is medium to high, with a likelihood of negative returns occurring 3.7 years in a 20-year period. |
| Growth | <ul style="list-style-type: none"> • This option is designed for members who are prepared to accept an aggressive asset allocation which has the potential of providing higher returns, but also increases the risk of a negative return. • Members will be seeking a net return of at least 4% p.a. above inflation (measured by CPI) over rolling 10-year periods to achieve their investment objective. • The minimum suggested time frame to invest in this product is 10 years. • The risk level of this option is high, with a likelihood of negative returns occurring 5.3 years in a 20-year period. | Conservative | <ul style="list-style-type: none"> • This option is designed for members who wish to select a lower returning asset allocation in exchange for more stability and security. • Members will be seeking a net return of at least 2% p.a. above inflation (measured by CPI) over rolling 5-year periods to achieve their investment objective. • The minimum suggested time frame to invest in this product is 5 years. • The risk level of this option is medium, with a likelihood of negative returns occurring 2 years in a 20-year period. |
| Balanced Growth | <ul style="list-style-type: none"> • This option is designed for members who want a balance between risk and return but who are prepared to accept an asset allocation weighted towards growth assets. • Members will be seeking a net return of at least 3.5% p.a. above inflation (measured by CPI) over rolling 10-year periods to achieve their investment objective. • The minimum suggested time frame to invest in this product is 10 years. • The risk level of this option is high, with a likelihood of negative returns occurring 4.3 years in a 20 year-period. | RetirePlus | <ul style="list-style-type: none"> • This option is designed for members seeking returns above CPI over the long term and who are looking for additional protection against market risk. • Members will be seeking a net return of at least 3% p.a. above inflation (measured by CPI) over rolling 10-year periods to achieve their investment objective. • The minimum suggested time frame to invest in this product is 10 years. • The risk level of this option is medium to high, with a likelihood of negative returns occurring 3.6 years in a 20-year period. |
| Balanced Plus | <ul style="list-style-type: none"> • This option is designed for members who want a balance between risk and return but who are prepared to accept a more aggressive asset allocation than the Balanced option. • Members will be seeking a net return of at least 3% p.a. above inflation (measured by CPI) over rolling 7-year periods to achieve their investment objective. • The minimum suggested timeframe to invest in this product is 7 years. • The risk level of this option is medium to high, with a likelihood of negative returns occurring 3.9 years in a 20-year period. | RetireStable | <ul style="list-style-type: none"> • This option is designed for members seeking returns above CPI over the long term and who are looking for additional protection against market risk with less growth assets than RetirePlus. • Members will be seeking a net return of at least 2% p.a. a inflation (measured by CPI) over rolling 5-year periods to achieve their investment objective. • The minimum suggested time frame to invest in this product is 5 years. • The risk level of this option is medium, with a likelihood of negative returns occurring 2.2 years in a 20-year period. |

| | |
|--------------------------|--|
| PositiveIMPACT | <ul style="list-style-type: none"> • This option is designed for members seeking moderate to high levels of capital growth over the long term with clear and tangible social and environmental impacts. • Members will be seeking a net return of at least 3.5% p.a. above inflation (measured by CPI) over rolling 10-year periods to achieve their investment objective. • The minimum suggested time frame to invest in this product is 10 years. • The risk level of this option is high, with a likelihood of negative returns occurring in 4.6 years in a 20-year period. |
| Australian Shares | <ul style="list-style-type: none"> • This option is designed for members who are prepared to accept an aggressive asset allocation which has the potential of providing higher returns, but also increases the risk of a negative return. • Members will be seeking to outperform the S&P/ASX 300 Accumulation Index, over rolling 5-year periods to achieve their investment objective. • The minimum suggested timeframe to invest in this product is 5 years. • The risk level of this option is very high, with a likelihood of negative returns occurring in 6.4 years in a 20-year period. |
| Overseas Shares | <ul style="list-style-type: none"> • This option is designed for members who are prepared to accept an aggressive asset allocation which has the potential of providing higher returns, but also increases the risk of a negative return. • Members will be seeking to outperform the MSCI All Country World Index ex Australia (70% unhedged / 30% hedged), over rolling 5-year periods to achieve their investment objective. • The minimum suggested time frame to invest in this product is 5 years. • The risk level of this option is very high, with a likelihood of negative returns occurring in 6 years in a 20-year period. |
| Property | <ul style="list-style-type: none"> • This option is designed for members who wish to select a moderately aggressive asset allocation, which increases the risk of negative returns. • Members will be seeking to outperform a blend of the Mercer Australia Unlisted Property Index (80%) and the FTSE EPRA/NAREIT Global Index (20%, hedged), over rolling 5-year periods to achieve their investment objective. • The minimum suggested time frame to invest in this product is 5 years. • The risk level of this option is high, with a likelihood of negative returns occurring in 4.7 years in a 20-year period. |

| | |
|-----------------------------------|--|
| Diversified Fixed Interest | <ul style="list-style-type: none"> • This option is designed for members who wish to select a relatively defensive asset allocation with more stability and security than more aggressive asset allocations. This option is expected to generate modest returns over time, with a small but not zero chance of negative return in any 12-month period and is considered to be more aggressive than cash. • Members will be seeking to outperform a mix of the Bloomberg AusBond All Maturities Composite Bond Index (50%) and the Bloomberg Barclays Global Aggregate Index (50%), hedged to Australian dollars, over rolling 5-year periods to achieve their investment objective. • The minimum suggested time frame to invest in this product is 5 years. • The risk level of this option is low to medium, with a likelihood of negative returns occurring in 1.5 years in a 20-year period. |
| Cash | <ul style="list-style-type: none"> • This option is designed for members who wish to select a very defensive asset allocation with a very low chance of a negative return and expected stable but lower returns over the long term. • Members will be seeking to outperform the Bloomberg AusBond Bank Bill Index over a year to achieve their investment objective. • There is no minimum period suggested for holding this option. • The risk level of this option is very low, with negative returns occurring 0 years in a 20 year period. |

Consistency between target market and the product

Analysis has determined that the needs and objectives of the identified class of members align with the key terms, attributes and features of the product as list above. The product provides personalisation through a variety of options and features as chosen by the member.

3. How this product is to be distributed
